Teaching

2024	BIOS27186: Population Biology of Infectious Diseases of Global Health Concern, University of Chicago. Professor. <ul style="list-style-type: none"> - Core course in Center for Global Health study abroad program in Paris, France. - The course is focused on quantitative approaches to understanding the transmission dynamics of infectious diseases, with a focus on pathogens of key global health concern.
2023-present	BIOS20153: Fundamentals of Ecology and Evolution, University of Chicago. Professor. <ul style="list-style-type: none"> - This is one of the three-quarter biology series required for undergraduate biology majors at the University of Chicago. About 170 students are enrolled annually. - My colleague, Dr. Marcus Kronforst, teaches the evolution half, and I teach the ecology half. - In the ecology half of the course, we focus on population ecology and cover topics ranging from geometric and logistic growth to Leslie and Lefkovich matrix models, to Lotka Volterra predator-prey and competition models to basic disease dynamics, and processes of community assembly.
2022-present	C4C: Coding for Conservation. <i>Founder, Instructor: coding4conservation.org</i> <ul style="list-style-type: none"> - This is a one-on-one mentoring program I founded to support Malagasy graduate students in biology and medicine to analyze, interpret, and publish their own field studies. - We meet virtually as a community once a month to discuss hurdles in research and sometimes share lectures and exercises on data data analysis and ecological modeling. - Each student is paired with a mentor, with whom they meet regularly to receive help and guidance on their own research progress. - Out of 17 students enrolled since 2022, 4 have published papers, 2 have submitted papers currently in review, and 3 others have papers in final prep with an anticipated submission in 2024. The rest are still being mentored to project completion.
2016-present	E²M²: Ecological and Epidemiological Modeling in Madagascar. <i>Founder, Instructor: E2M2.org</i> <ul style="list-style-type: none"> - I founded this annual workshop in 2016 to support Malagasy graduate students in biology and medicine in the quantitative analysis of data and the development of model-guided scientific questions. It is a basic introduction to the more advanced C4C program. - In part with this 10-day course, I design and deliver lectures and tutorials in the R programming language workshop, with a focus on topics related to ecology and public health.
2015-2016	International Clinics on Infectious Disease, Dynamics, and Data. <i>Workshop Faculty: ici3d.org</i> <ul style="list-style-type: none"> - I designed and delivered lectures and exercises for multiple introductory programming (R) workshops for African and North American students in biology, medicine, and public health.
2014	Evolution & Behavior of Sexes. EEB 301. Princeton University. Assistant-in-Instruction. <ul style="list-style-type: none"> - As an Assistant-in-Instruction, I taught weekly discussion section and designed exams and assignments for this upper-division seminar in Ecology and Evolutionary Biology (EEB).
2012-2013	Life on Earth. EEB 211. Princeton University. Assistant-in-Instruction. <ul style="list-style-type: none"> - As an Assistant-in-Instruction, I taught weekly discussion section and designed exams, labs and assignments for the primary introductory course in the EEB major at Princeton.
2009	Introduction to Earth Systems. ES10. Stanford University. Teaching Assistant. <ul style="list-style-type: none"> - As a TA, I taught weekly classroom section, wrote and graded assignments, and designed curriculum for the primary introductory course in the ES major at Stanford.
